Patient Education Workshops

Patient education workshops are one of what I think is the most important things that we do because I believe a lot in a saying, if you know better, you can do better.

So you could never really create change or be totally aware of whats going on with your body if your not educated properly. In my office we have bi-weekly educational seminars on a variety of topics.

We'll talk from cancer to infertility to depression to anxiety you know you name it we're going to talk about it. So every other Tuesday you can catch a free complimentary seminar in our office at Synergy Nutrition and Wellness.

As a perk to coming to one of our seminars not only do you obtain free education you get a chance to sit in the room with other people who are like-minded as well as a professional to speak on the topic you not Only get that But as our gift for spending your time because we appreciate your times, you're going to get a complimentary consultation.

So what could be better than free education, free consult, and a plan to improve the quality of my health? Check us out at 716synergy.com or Facebook Synergie Nutrition and Wellness as we are always updating our seminar schedule, but we do those currently on a bi-weekly basis every other Tuesday.
