Creating the Cleanse Challenge

hi my name is samantha lander and i hi my name is samantha lander and i wanted to personally introduce myself wanted to personally introduce myself and tell you a little bit about me and and tell you a little bit about me and then about the cleanse challenge that i then about the cleanse challenge that i am offering january 10th am offering january 10th um and give you a little bit more um and give you a little bit more information so hopefully you will sign information so hopefully you will sign up and be a part of this amazing up and be a part of this amazing challenge challenge challenge i am from st louis missouri i went to i am from st louis missouri i went to university of michigan university of michigan i i i graduated and moved out to la and was a graduated and moved out to la and was a dj for seven years and then i moved home dj for seven years and then i moved home and that's when i became a personal and that's when i became a personal trainer i was an athlete my whole life i trainer i was an athlete my whole life i always worked out so it was something always worked out so it was something that came very naturally to me so i was that came very naturally to me so i was really excited to just kind of have that really excited to just kind of have that be a part of my life be a part of my life so with that um i so with that um i you know trained really really hard i you know trained really really hard i ate really really clean i taught my ate really really clean i taught my clients how to eat clean and you know clients how to eat clean and you know they trained hard and i thought that was they trained hard and i thought that was just kind of the answer like calories in just kind of the answer like calories in calories in calories out count your calories here's calories out count your calories here's what you can't eat here's what you can't what you can't eat here's what you can't eat um you know i kind of put my clients eat um you know i kind of put my clients on some of the fad diets but not really on some of the fad diets but not really um no um no that would be like a tough case scenario that would be like a tough case scenario where just nobody was reaching their where just nobody was reaching their goals um and i had some clients that goals um and i had some clients that were definitely reaching their goals and were definitely reaching their goals and you know you gave them a great nutrition you know you gave them a great nutrition plan and we just worked on cleaning up plan and we just worked on cleaning up their diet and carbs and ratios like their diet and carbs and ratios like that and things worked great but then that and things worked great but then there were clients like me there were clients like me where where where it was a lot more than that like i it was a lot more than that like i worked out i never had a cheat meal i worked out i never had a cheat meal i busted my ass at the gym and my results busted my ass at the gym and my results were like it's almost like i was gaining were like it's almost like i was gaining weight and i felt worse weight and i felt worse and i was puffy and my hormones were and i was puffy and my hormones were awful awful awful i had a lot of gi issues i suffered from i had a lot of gi issues i suffered from a gamut of health autoimmune i know a gamut of health autoimmune i know candidia um sibo candidia um sibo i've had multiple parasites i've had i've had multiple parasites i've had estrogen dominance so for me just estrogen dominance so for me just working out and eating right was not the working out and eating right was not the answer and i realized there was a lot answer and i realized there was a lot more to that so i started to kind of more to that so i started to kind of navigate the detox pathways and look at navigate the detox pathways and look at the detoxification system and see if the detoxification system and see if that could be something that could be that could be something that could be holding me back and holding some of my holding me back and holding some of my clients back clients back and come to find out that was a huge and come to find out that was a huge missing piece to the puzzle missing piece to the puzzle and at this point i actually i was and at this point i actually i was certified as a functional diagnostic certified as a functional diagnostic nutritionist nutritionist nutritionist um kind of midway through my like um kind of midway through my like through training and the first two years through training and the first two years um so i started training in um so i started training in 2009 and then i was a fdner in with a 2009 and then i was a fdner in with a functional diagnostic nutritionist in functional diagnostic nutritionist in 2010.
