Flu Season Death Toll

The 2020 Florida S-25 flu season didn't just spike, it leveled some lives. A preliminary CDC assessment puts flu-linked deaths between 38,000 and 99,00. For kids, it was one of the deadliest years on record.

Two to 80 children lost to the flu.

Child Flu Deaths and Off-Season Cases

Shockingly, at least three of those kids died in June and July, far outside the usual flu months. This isn't just a winter problem anymore. If you've been putting off vaccines, stuffy coughs, worrying about symptoms, now's not the time to wait.

Year-Round Flu Prevention

Talk to your doctor. Watch for high fevers. watch for difficulty breathing. Keep vulnerable people protected. These numbers are a reminder to take flu seriously year round.
