Introduction and Dr. Bloom

I am a hard stick, and he's the only I am a hard stick, and he's the only doctor that I have ever known, including doctor that I have ever known, including surgeons, because I have a scar from surgeons, because I have a scar from having um IV through the neck. Hi, having um IV through the neck. Hi, everybody. My name is Tara. I am here at everybody. My name is Tara. I am here at Dr. Bloom's office having a really great Dr.

Rare Disease and Surgical History

Bloom's office having a really great day, and I wanted to explain the reasons day, and I wanted to explain the reasons as to why I came, how I came. So, I was as to why I came, how I came. So, I was initially introduced to Dr. Bloom based initially introduced to Dr. Bloom based on friends and family, which is always on friends and family, which is always great word of mouth. Um the reasons that great word of mouth. Um the reasons that I am here is to live life, because I am here is to live life, because that's what life is, after all. So, I am that's what life is, after all. So, I am here because I am receiving treatments here because I am receiving treatments due to the fact that I was born with a due to the fact that I was born with a rare disease. One in 6,000 children are rare disease. One in 6,000 children are born with intestinal malrotation.

born with intestinal malrotation.

Hard Stick Challenges and Trust in Dr. Bloom

And what I hadn't known about that was And what I hadn't known about that was that it is a procedure that you have to that it is a procedure that you have to do, exploratory surgery to put the do, exploratory surgery to put the organs in the right place. So, why I am organs in the right place. So, why I am here is to explain why Dr. Bloom has here is to explain why Dr. Bloom has given me my life back. For months to for given me my life back. For months to for 12 years, I was battling this condition, 12 years, I was battling this condition, and I've had a total of five surgeries.

and I've had a total of five surgeries. So, I am known as a hard stick, and a So, I am known as a hard stick, and a hard stick is when it's very hard to get hard stick is when it's very hard to get an IV in your vein, and it's something an IV in your vein, and it's something you would never think of a day in your you would never think of a day in your life, but my veins are just gone. So, life, but my veins are just gone. So, one thing that I can say that I trust one thing that I can say that I trust Dr. Bloom over going to a hospital is Dr.

Inflammation, Hospital Care, and Pain Management

Bloom over going to a hospital is he's the only physician that can get me, he's the only physician that can get me, because I am a hard stick, and he's the because I am a hard stick, and he's the only doctor that I have ever known, only doctor that I have ever known, including surgeons, because I have a including surgeons, because I have a scar from having um IV through the neck, scar from having um IV through the neck, and he is the only doctor that gets it and he is the only doctor that gets it once, which is heaven-sent. So, I'm here once, which is heaven-sent. So, I'm here to talk about the Procaine and the Pico to talk about the Procaine and the Pico IV that I've been receiving. And the IV that I've been receiving. And the reason I'm also receiving that is reason I'm also receiving that is because with this condition that I was because with this condition that I was born with, I have very high high high born with, I have very high high high marker of inflammation. Even though it marker of inflammation. Even though it may be detected that you don't have an may be detected that you don't have an infection, you still infection, you still there still is an inflammation marker.

there still is an inflammation marker. And usually what it means is me being And usually what it means is me being

hospitalized for up to 3 months to be hospitalized for up to 3 months to be given morphine, Dilaudid, all these IV given morphine, Dilaudid, all these IV pains. And Dr. Bloom has made it so that pains. And Dr. Bloom has made it so that all of this is not pharmaceutical, that all of this is not pharmaceutical, that this is on the holistic approach, and to this is on the holistic approach, and to know that know that I'm getting the help that I need.

I'm getting the help that I need. Doctors, or to the hospital, let's say, Doctors, or to the hospital, let's say, they have to give me ketamine for the they have to give me ketamine for the first 72 hours because of the first 72 hours because of the inflammation markers and or their liver inflammation markers and or their liver enzymes getting high.

enzymes getting high.

Procaine and Pico Treatment Benefits

So, like I said, usually in the So, like I said, usually in the hospital, it's IV, and then it's pain hospital, it's IV, and then it's pain meds, and then it's the breakthrough meds, and then it's the breakthrough pain that you get through the IV, and pain that you get through the IV, and then it's also the tablets that they then it's also the tablets that they send you home with.

send you home with. So, guess what? I'm here to tell you So, guess what? I'm here to tell you that with the procaine and with the that with the procaine and with the pico, pico, pico, I have never in my life, if you've ever I have never in my life, if you've ever been on ketamine, it gives you that been on ketamine, it gives you that sedat- that sedated effect, but it also sedat- that sedated effect, but it also makes you feel your whole body feels makes you feel your whole body feels life again. So, Dr. Bloom has life again. So, Dr. Bloom has legitimately legitimately legitimately in the 12 years that I've been fighting in the 12 years that I've been fighting he has saved my life in many ways, and I he has saved my life in many ways, and I urge and I plead you to look into these urge and I plead you to look into these treatments, and trees and to truly treatments, and trees and to truly believe me with somebody who gets sick believe me with somebody who gets sick every other day, every other day, this treatment has not made me sick.

this treatment has not made me sick. This treatment has given me my life This treatment has given me my life back, and I owe it to Dr. Bloom. back, and I owe it to Dr. Bloom.
