Introduction and Practice Background

Hello, I'm Dr. Demeter Bella, and I am an owner of a restore podiatry here in New York. We're a direct care process meeting where our patient pays us directly, which has its own unique set of challenges.

In the past five years, we've worked with eight different marketing agencies, but none of them were able to really target the type.

Marketing Challenges With Previous Agencies

and the kind of patient we needed or help us to go in the right direction. That changed everything when I hired Orange Care Marketing last year.

Working With Orange Care Marketing

It's been about 10 months so far and we are seeing the positive change and emission growth so What I love about them is that how they handle everything for us from social media, editing, coaching across all the platforms, to blogging, branding, and advertising.

They have really helped us to come up with a game plan for our strong online presence.

Building a Strong Online Presence

One thing we really needed was a proper system that would allow us to spread awareness about the amazing treatment we offer while targeting the right type of patients.

Orange Carrot has helped us achieve that slowly and we are seeing the measure grow slow. We are currently working with them to optimize our website and improve our overall online presence so we can rank higher on our Google presence.

This will help us our visibility, attract specific type of patients, and ultimately go our presence to the next level.

Website Optimization and Growth Goals

I would definitely recommend Orange Carry Marketing to anyone who's looking for a marketing company that can do it all. From handling your social media to branding and optimizing your website all in one market.

They've been really helpful for us and thank you Orange Carrying for all your support and we're looking forward to more growth. Thank you.
