Introduction to Root Cause Medicine

What is root cause medicine? Dr. George What is root cause medicine? Dr. George Moritz here with the Alzheimer's Moritz here with the Alzheimer's Treatment Centers of America. A year Treatment Centers of America. A year ago, I released an international ago, I released an international bestseller. And none of this is here to bestseller. And none of this is here to impress you in any way, but to impress impress you in any way, but to impress upon you the need for this book. It, I upon you the need for this book. It, I believe, was so wellreceived because believe, was so wellreceived because people knew deep inside you knew that people knew deep inside you knew that there was a reason you got cancer. There there was a reason you got cancer. There was a reason you got dementia. there was was a reason you got dementia. there was a reason you had inflammation, a reason you had inflammation, autoimmune, issues with COVID. People autoimmune, issues with COVID. People know this and yet people were afraid to know this and yet people were afraid to ask. So, it was very wellreceived and ask. So, it was very wellreceived and for that I thank you. Um, a little more for that I thank you.

Why Traditional Dementia Care Falls Short

Um, a little more on dementia. So, with over a hundred on dementia. So, with over a hundred root causes of dementia, it's no wonder root causes of dementia, it's no wonder that traditional therapies fail. You get that traditional therapies fail. You get an imaging scan, they promise you a an imaging scan, they promise you a therapy, maybe a pill, come back, we'll therapy, maybe a pill, come back, we'll document your decline is what I call it.

document your decline is what I call it. It's very disappointing. And I know some It's very disappointing. And I know some of you already have stories like this.

of you already have stories like this. If at any point during our discussion, If at any point during our discussion, you've said, "Hey, this doctor kind of you've said, "Hey, this doctor kind of gets what I'm saying, then you're really gets what I'm saying, then you're really saying is that maybe I too should look saying is that maybe I too should look into what's causing the dementia for a into what's causing the dementia for a loved one." Cuz many of you are going to loved one." Cuz many of you are going to be caregivers. Your road is not going to be caregivers.

Caregiver Impact and the Need for Deeper Evaluation

Your road is not going to be easy. In another section, we talk be easy. In another section, we talk about the true cost and expense to the about the true cost and expense to the family. You're losing someone one memory family. You're losing someone one memory at a time. Other parts of your lives are at a time. Other parts of your lives are changed. You don't recognize the person.

changed. You don't recognize the person. But for many of you, you're still But for many of you, you're still understanding that, hey, wait a second. understanding that, hey, wait a second.

AI, Personalized Treatment, and Modern Therapies

If there's more than one cause, wouldn't If there's more than one cause, wouldn't you need a more complex way to evaluate you need a more complex way to evaluate it and treat it? Well, that's where it and treat it? Well, that's where artificial intelligence comes in. We've artificial intelligence comes in. We've seen this used in other industries like seen this used in other industries like commerce and space. So, why wouldn't we commerce and space. So, why wouldn't we now use it for this? So, what is root now use it for this? So, what is root cause medicine for dementia? Well, cause medicine for dementia? Well, something that people had not talked something that people had not talked about is what if you could do continual about is what if you could do continual evaluation and

individualized and evaluation and individualized and customized treatment. Now, that's really customized treatment. Now, that's really VIP concierge. It's not a question of VIP concierge. It's not a question of whether you get access for a Zpack when whether you get access for a Zpack when you have a cold, you have dementia. So, you have a cold, you have dementia.

Functional Medicine and the Next Step

So, you need someone constantly looking and you need someone constantly looking and using the latest in AI, the latest in using the latest in AI, the latest in energetic therapies, the latest in energetic therapies, the latest in nutrition science. Now, some of you have nutrition science. Now, some of you have gone through the functional medicine gone through the functional medicine approach. Functional medicine works approach. Functional medicine works great when you're 20, but when you're great when you're 20, but when you're 50, you still have to rewind the person 50, you still have to rewind the person back to youth. And I write more about back to youth. And I write more about that in my bestseller, root cause that in my bestseller, root cause medicine. For others of you, you figured medicine. For others of you, you figured out, hey, look, I can't do this on my out, hey, look, I can't do this on my own. I can't just go to the regular own. I can't just go to the regular doctors because it's always the same doctors because it's always the same story. And for those of you, I invite story. And for those of you, I invite you to read chapter 7, uh, Audible for you to read chapter 7, uh, Audible for those that like to listen, where I those that like to listen, where I actually go through some of the latest actually go through some of the latest in dementia science and Alzheimer's. And in dementia science and Alzheimer's.

Book Chapters and Call to Action

And for some of you, you're already ready to for some of you, you're already ready to take the next step. And for those of you take the next step. And for those of you who want to stop the decline using AI, who want to stop the decline using AI, contact us at Alzheimer's Treatment contact us at Alzheimer's Treatment Centers of America.
