Introduction and personal story

Great. All right. Hey, everybody. I'm Dr. Remka. And today I am going to do something a little different. It's an experiment. I'm going to try something different.

I've been doing a lot of presentations lately, and I personally am getting tired of the way I am doing it. So I try to something for all of you ones. It's your first time.

Please, if I do a bad job, don't judge the person who cared enough about you to tell you come here today, because I'm choosing to go a little off script and change it up.

So if get on base or hit a home run, yay, you. If I don' please, please don''t blame them for my mistake. But you gotta try new things sometimes. That's how I feel about it.

I''m Dr. Remka, right? Some of you may know me. People are still coming and we're good. Awesome. Just want to actually check. We are recording and good, hang on.

I'm not the most technical person on the planet, you guys, but we'll get it done together. All right. Here we go. I am Dr. Rumka, and today I want to do this a little bit more like a conversation.

I will eventually share my screen and show you a PowerPoint, but let's just do something different. Let's talk. Get to know each other, right? Some of you may know me as a doctor, a speaker, teacher, even an MLM network marketing seven-figure earner.

But before any of that, I was just a little girl with a big heart, a curious mind and a mom who worked 80 plus hours a week just to keep food on the table for me and my brothers and sister and to get the lights turned back on after they got cut off.

We were on food stamps my entire childhood. I needed government Medicaid health insurance and I remember I hate talking about this. I remember watching my mom more than one time ask a doctor with her eyes downcast if there were free samples for my prescription because she couldn't afford to pay for it at a pharmacy.

As you can see, those moments still live in me and they drive me. And it's why I care so deeply about financial freedom. It's a very high value of mine.

But I'd care about it, not just my financial Freedom, but yours, because in every woman that I talked to about these products or this business, I still see my mom or I see that little girl.

And that's Why this opportunity matters. To me, it's deeply personal. Now, someone invited you here today for a reason only the two of you may know. But they cared about you.

And I'd like you to remember that. I would like to tell them thank you, even if I do a terrible job today on their behalf. They cared. Now, I don't pretend to know why you showed up here on a Saturday.

Why you decided to invest your time to learn about Korean skincare. So I'm gonna talk a little bit more besides my own childhood, you know, poverty story about why I am here.

Why did I choose to plant my tiger grass flag here at Ramon? And maybe you'll be able to relate to a bit of it. And then I will get to little of a PowerPoint.

Why beauty and skincare matter

All right, it starts with asking myself and yourself right now, why beauty? Why the face? We've been taught that beauty is vanity, that skincare is shallow, but beauty, true beauty.

Is about how your nervous system speaks to the world. Your face is your first connection point. It's how people feel you. safety, vitality, presence. And Remon is about reframing the mundane into the sacred.

Skincare here is not just a routine, it is a ritual. When we reclaim that process as sacred, we're able to reclaim our own power. That's what it was for me.

Let me tell you what blew me away about the company and the opportunity and products. We own our own smart farms. We grow and control the plants inside our products.

As Tim Hurst says it, we jump into a volcano to go get water. So we extract volcanic water from deep inside a dormant volcano in Korea to get this very special medicinal, mineral-rich, and frequency-charged water, what?

We also have 16 patents on our products. Excuse me? Here's even better. We own our own plant. Nobody else can have it. And this plant that we use in the products, it's bigger and better than everyone else's, and no one else could use it!

We are the number one rated K-beauty brand in Korea with over 40 million bottles sold there. It's the size of Indiana with only 52 million people. What?

Okay, now we didn't just grow our own plant. We built our products with these patented plants and exclusive use of this wild volcanic medicinal water The owner of this company in addition went ahead and he built a healing village, a resort for his distributors.

He created a vision of rebirth and a demand for luxury that everyone can afford. definitely appeals to the poor little girl inside of me, okay? Plus my own personal skin transformation was incredible.

Listen, I'm a practicing doctor. I've been on six medical boards. Am a product formulator. am a Product Consultant for several corporations. i usually wait at least 30 days and beta test new products on myself and dozens and thousands of clients before I ever say a word or offer it to anybody.

But with Ramon, my own skin transformed literally overnight. On day two of using the product, I did something I've never done in my career. I went public, made a video, and sent out my link.

Because the anti-inflammatory response was so immediate, on my sudden hormone-induced cystic acne at 50 years old that I knew I couldn't keep this to myself.

I could not be that selfish. So then there's more. Here's what also we don't do. We don' slap labels on some factory-made bottles that we are white labeling someone else's thing.

He builds every single part of this product in a vertical integration line. Insane.

Ramon products, science, and results

What Riemann is, they are the guardians of this ritualistic tradition that heals fascia, hydrates the skin, supports your vagus nerve, and restores your natural glow from the inside out.

After all, Rieman in Korean itself means rebirth. So But right before I get to the PowerPoint. Let's talk about how to marry the vision of this company and the products with what I just said with the market demand because that births this incredibly unique industry opportunity that we're all standing on right now.

K-beauty isn't a trend. It's a global wave. There's 350% increase on Google and searches for it for Korean skincare and K beauty. there's 270% deficit on TikTok for which means more people are searching for korean skincare on

tiktok than there are videos there.

So the demand is very high and the supply is limited. Luckily, Riemann has come upon the scene in North America just two short years ago, but most people haven't even heard of it yet.

There's a very high satisfaction rate with K-Beauty brands, Korean skincare, 80% satisfaction, and a high repurchase rate. Hmm seems really interesting if you want to sell it or offer it to somebody, right?

So I'm going to say this if You decide to join us in this movement of turning a half to like I have to wash my face. I Have to Wash my hair and turning it into a want-to of sacred self care that we promote You'll soon find out You're not selling skincare you're stepping into a multi billion dollar wellness movement that aligns science, soul and systems that work.

So I'm going to share my screen now and I want to show you my favorite three minute video that will explain to you a small size slice of the science and the power of nature that sets our products and our results apart from everyone else.

Give me a second cause I am slightly clunky with this. Hang on, share screen. Tim told me how to do this. I have to share my sound. Why? Oh, hang on. There it is.

Share screen options. It's looking funny. Give me, I promise you I'm gonna do it, you guys. Is my chat so strange? There it is. It's how I'm used to seeing it.

Share sound, share. See, here's the joy of editing. I am recording. Somebody can cut that all out. Uh-oh, hang on. To share your computer audio, you must install the I don't know how to do that.

So we're just going to have a slight problem and that's okay. I apologize. Tell me in the chat if you can actually hear this. If you cant, I'll just talk over it.

You can't hear it, my bad. Can you hear me talking? Work with elements provided by nature. Yeah, can you hear me? Okay, I apologize. There's some special password.

I'm not good at that. Among the many gifts of nature. This is my favorite video. Please ask the person who sent you here to send it to you. It's only three minutes.

it's beautiful. So what you're showing here is the process of Byangpul, the size of the leaf. It is a hero ingredient, and Biancool is very small. See how tiny that one is?

It's a size of about a quarter. He grew the BianCool, AKA Tiger Grass, aka Asiatica Pennywort. he grew it in the Jeju lava water. I am so sorry about the sound.

And he made it become five times the size as normal. That's why it's called giant. and they're showing you. This is the water. It's incredible. So this is a dormant volcano, Halasan, in Jeju Island.

I was there in October and I able to drink it, I could bathe in it and taste these things. Because the volcano is 400,000 years old, the way the rain water comes up the basalt volcanic ash, grabbing all these minerals that came from deep, deep within the earth that are no longer even present in our topsoil.

So this is some of the most mineral rich water you're going to ever encounter. It's way down underneath. They had to drill down. so it's not water that people can walk to.

it is the cornerstone powerhouse of our product line. the cell of the dermis. So he's showing you some of that nanoliposomal technology, how we're able to make these small little vesicles so things are driven in.

We have a very, very unique ritual of booster, these sprays. Very un-American. Then you put a serum. And what

we are doing is driving the products deeper and deeper into the layers of skin.

Lots of products that you're using just sit on top. They're not actually going inside and doing anything. So not only does this get inside of the green layers, it goes inside the cells.

And this is a beautiful illustration of how it brings your own radiance, your light back to you. Because what is the light that's reflecting? What is that glow we're talking about?

It is the reflection of light on top of bouncing off water. So when people start looking dull, it's because they're losing water, so this is a very, very powerful, unique water I apologize about the sound.

I have to escape. Why? Okay, let's stop share. Tim is gonna be like, this woman. Hang on, I promise I can do it. I just did something totally weird. Oh, that's even worse.

Go away, there we go. See, even you can be this klutzy with technology. And I'm gonna tell you, I make a lot of money and help a lotta people, and I barely know how to do this.

Don't worry about it. Usually somebody's here, like I can do it, felt so competent before this, okay, hang on, almost there, got it! Share. Now I just know that I have to something for sound next time.

View. Great, can you guys see that? Can you see the results? Fantastic, I'm gonna pull the chat back up so I can see what you're saying. Listen, y'all can laugh at me, appreciate it.

I mean, life is life, right? Let me make sure I know what slide I am on. Cause I can't tell what I'm doing at this point. All right. What happens when you use the results?

I mean, use, the products here, you get results. It's that simple. Alright. These are real people, I know some of them. That's a guy right there, Tim.

This is five days. I want you to see what's happening under her eyes. Want you see Tim's forehead, and that's 30 day pre and post. Look at what is going on.

this is not covering something up, this not fake. into the skin because we're able to get real ingredients that actually do something inside the cell to be effective.

Skin cells should turn over every 28 days. The older we get, they don't. That's why they look dull and tired and crackly and all ashy.

Product lines and ingredient advantages

Nobody needs that. She has 30 days there. Look at the difference in that woman. I mean, I don't even know what to say. These are not filters. I promise you.

No one is lying to you here. There's no trickery. It's just we just get results, right? So here's another one that shows you we have… Here's the clue you saw we just had faces now i'm showing you hair and body so we must have products that cover all of those things.

This young woman is scalp psoriasis and she has suffered with it and been embarrassed by it doesn't want to pull her hair up she's young like nineteen twenties or something like that.

And this is one wash. She used it only one time and got a 90% improvement from the itchy and irritation and embarrassment and shame and hiding it she was doing.

I have used this on countless psoriasis patients and they're so ecstatic. Look at the crepey skin. This is the body cream. And body wash, it's April to June, so April, May, June.

We got three months there. Incredible. That's not cover-up, that's going deep inside and turning back the hands of time. It's hydrating, moisturizing.

This is actually repairing DNA and telomeres, you guys. There's a lot of real healing that's happening with this. Then you can just see some various hair examples of thickness and regrowth and regeneration.

And this is a game changer for people's hair regeneration, there are Korean studies and they used it every single day for six weeks. So the more frequently you use it, the better results you'll have.

so ask your planner about if you only been using the face and you didn't know we had hair, care we do all right so these are the brands and i just want you to think about this you know the video which i apologize the sound would have done a better job than me but we have three brands icd think of that that's the face Everybody's face.

I don't care if you're 13 or 96. It's the face right there. Okay. There's two lines only very simple. The top line that you see with the clear bottle would be the water based a lot of Jeju lava water and beyond pool hydration.

We start most people there The second line, the glass bottles is kind of the professional deeper line from 50 and up or very dry skin, a little bit more mature, little stronger to bring more collagen back into it.

So incredible line. I use the top line morning and night. Some people use top in the morning, some people the bottom line at night, talk with your skin care consultant and ask them about what you think is the best way to approach it starting for you.

Bodalab would be the shampoo, think hair and body. what you're going to wash your hands and body with in the shower. What you going put the cream all over?

I got, I have that cream over me today. I, have the hair. So just so you know, lightening would be the nutritional products that are dealing with beauty from the inside out.

There's two products right now. Think of them that the things you swallow, like the food things just swallow. The collagen is a beauty collagen with the lava water.

And then there's a gut supplement as well. to help heal your skin from the inside out. Okay, I'm not gonna spend too much time on this, but I love this.

There are some skincare companies right now that are really bragging that they don't use water, for example, and some people they wanna like say it's a bad thing.

Well, understand what they're saying because most products in the market, you walk into Target, Walmart, Sephora, Ulta, even Chanel or L'Oreal or Lancome.

They're using distilled water and most, most if you're lucky, if they're, using tap water, and you've got chlorine and fluoride and antibiotics, it's an even worse story.

So at least distiled is clean. It's dead. it has no minerals. and has, no frequency. And it is considered dead water. Fish will die in it. I mean, It is dead Okay, but you're often paying for a lot of dead water and a little bit of ingredients.

So I hear their point. They're like, you getting ripped off. You usually are, But waterless doesn't make any sense either. when you have Jeju lava energy water, which has a very high alive rate and has more minerals in it than you had ever encountered in drinking any mineral waters that you can buy.

As well as very strong concentration, 30% of giant byung pool extract, and now we've even made it stronger, as well many other ingredients, plant extracts, NMN, exosomes, you name it, we're jacked and stacked with it.

Pay attention. I love this picture because it's when somebody wants to say, well, I'm using the one without water. You're not real smart, are you? So again here's just a quick you know idea of what we were talking about these special the giant beyond pool that we own have a patent nobody else in the world has this and he did it because he grew this tiger grass and they call it tiger grasp because the tigers in Asia when they're wounded after a fight or after some type of you catastrophe.

They roll around in it so when they're when their hurting and not doing well they go to the patches of the stuff and they lay around and people observed why the tigers always do that.

And it's because when I studied it wow it has. these polyphenols and extracts that make them heal faster so the tigers and figures if it's good enough for a tiger it is definitely good for me.

So we know what it s doing taking away hyperpigmentation, wound regeneration, anti-inflammatory, very very soothing. The energy water we talked about he is the only person given permission by the Korean government to use this water in cosmetics or beauty of any sort.

You will find it in no other product in the world. He's the Now he also took science and made very very small droplets of the material so it absorbs not only into the skin but gets inside your actual cells where it matters.

Things in the blood don't even matter if it doesn't get inside the cell. So now what is coming up makeup and this takes me back to something I really really want you to know April 16th make makeup is Coming but it's not just regular makeup as good first of all It's gonna cover everybody's color everybody range I have it all sitting back here because I was lucky enough to get a whole bunch of it for free early But April sixteenth y'all can get it too.

You can order it and It is considered a cushion, 4D cushion. La Mer is a very famous brand. 150 bucks for one little compact. If you take yourself to Neiman Marcus, if you booze your boo boo, what do you want to guess ours costs?

I know the price. What do want a guess? Tell me. Put it in the chat. what you think ours is going to cost? Fran, you're real close, real good. $55, US.

Canada's a little different. I can't speak to every other, 55. The lip tint, $27. What?

Makeup launch and business opportunity

And the lip tent, by the way, doubles as your blush. Say what? What just happened here? Uh-huh. Now, this isn't just color cosmetics. Byung pool, the giant Byoung pool extract is in there.

The Jeju lava water, other plants. So it's anti-inflammatory, soothing, hydrating, and moisturizing. You're getting healing and regeneration, not poison and not damage.

What? Yeah. Now, this is what I love about this though. what do you think is the industry in the United States that has made more female millionaires than anything else?

I'm gonna say it, it's network marketing, MLM, more female millionaires than anything else. I did not stutter. Do you see why I like it here so much? And here's what about this that I'd like, I do have a doctorate degree, went to college for eight years, have license, can do all kinds of things, but you don't need a degree.

You don' even need like a really clean past. What do you need to do something here? Hunger, coachability, discipline. Now, if you got a leader that'll help you tend your fire a little bit more, that's even better.

That's all I had, That' all i needed, and it changed everything. Not only for my life, but for momma's life too, because she's much more comfortable now today than she ever was.

Thanks to network marketing and some other things that I've been able to So speaking of money, let's talk about it briefly. Compensation plan. Now, this is like, you know, a lot going on here.

Here's the thing. I'm not gonna get into this much. Tim Herr did an incredible 19 minute breakdown. We have a video of that. Ask the planner that sent you here, your friend who cared about you.

Okay, I wanna know a little bit more. Send me that video. It's really good and he'll break it down. You can slow it if you want. Just know this, when you start, You get 10% on everything you sell of your own purchases and what you what to sell to your friends.

That's great. Some of you that's awesome 10%. You can earn like your products free so you just offset your beauty and your radiance. Fantastic. It's a glow up for you.

Managers, though, you can double that commission like that overnight. So think of it, most of our managers that rank, they're selling about, $1,000 a month.

Every month, if you buy and sell $1000, You'll get 20%. Basically, think about it that way. Senior managers are selling about $2,000, $2500, a little bit like that.

They're selling that much every month. they have that many customers. You know, they're doing that now. Senior Managers have a unique opportunity now because we changed our comp plan to earn 40% on everything they sell.

That's incredible. that means somebody can come in, never sign anybody up, but be an incredible customer getter. This could be a hair salon, nail salon a chiropractor, dermatologist, general physician, a cardiologist, doesn't matter.

They want their clients to have non-toxic, non endocrine disrupting, you know, skincare that's safe and not going to ruin their hormones. There you go.

That can get 40% and never have to, have stock in the office. they have a drop shipping, website, easy peasy. It only costs $20 for a year to Have your own website and that drop-shipping service to become a planner.

So it's a $ 20 investment. Now, I say you go big or go home, you can literally just give yourself a raise. So you make yourself become a manager as soon as you enter.

You can buy yourself two big starting kit packs, have a bunch of products so you use it and share it, and you're a Overnight basically you can also do the same thing to become a senior manager overnight i have a lot of businesses brick and mortars doctors typically buy four big packs they spend the they get the six thousand you know about seven thousand dollars they need the stock they make a immediately on everything they sell.

Talk to the person who sent you and they'll go over how you can give yourself raises. Team leader, though, unlocks a very, very different thing. But I want you just think about that.

And you see this times three months, times, three, months times five months. We roll over the volume like you don't lose a volume every month. So that's if you accumulate three thousand dollars in sales in three months.

In three month, so it's like a thousand a month. That makes you a manager. Now again, you could do it in five minutes if you wanted, or you can do in 3 months, team leader you get up to five months team leaders are just kind of they have so much volume on their team.

They have a lot of people working, a lotta franchises basically, and they're averaging at least $10,000 in Sales as a team every month that could be You know 10 people 20 people you know I don't know exactly but they have at least 3 senior managers so you're getting at 6,000 a month just from them that make sense that we can break that down for you more later.

Oh did I tell you we own our own farm. Do you remember that? Look at the bottom of that picture. You see the giant leaf and the little tiny one? That's regular tiger grass.

And then there's our giant tigergrass. Byungpool, giant Byoungpool. I was actually at this place in October. It is real. I walked around it. i ate the plants.

you can eat them.i think it's good. Some people didn't like it, some people had that soap taste, i thought it was delicious. it is ginormous and incredible.

It's insane to even see it, but he didn't just want to build it. He wanted to built it in such a way that it saved the environment of Jeju Island, which is a UNESCO heritage site.

And it's a smart farm. So he got consultations from the Netherlands on how to do it is he's, a brilliant man, brilliant, bright man. Now this comp plan looks a little bit more complicated.

I just want to say it's like this. Think of it like plan manager, senior manager. At that point, it is an incredible hybrid affiliate model where people don't have to build a team at all and just get customers and sales and they make different ranges of money in different commissions based upon how much sales they get.

The more you sell, the more your earn, which is kind of cool. And then you can see this uni-level process for the network marketers with experience. That goes into effect in June, and it is causing wild, exciting increases in paychecks.

We've been running the numbers of simulations. Were super excited for people on our team. I have people in my team whose their checks are going up 200%, 600%, 40%. We're super, super happy for these changes.

The company listened to us.

Compensation plan and leadership growth

And we like it team leader and above up by the way so i'm a director just i should have probably introduced that when i talked about that team later and about point you want to develop leaders what i want you to understand is.

You don't have to do that here, you could just basically say I'm a great customer getter and I am a senior manager and get it done. If you want to build a team, if you like people, like connecting, developing people and helping them win, team leader and above is what you need to look at and our percentage of sales goes up much higher.

I make a higher percentage in my customer sales. I also make all these uni-level matching percentages on everybody beneath me and my team. So that's really, really fun.

In addition, directors and hire, we have a leadership override and revenue share in the company. What? Say who? And they did $3 billion? Excuse me? Yeah, you want to get there if you wanna buy your mom a new condo.

Oh, the owner also built us a village, a resort. This is where it is. I was there in October. The owner built a healing vacation retreat spa experience that side over there is all marble.

That's the coffee shop. THAT'S THE COFFEE SHOP. And you walk in and they're like, no, you don't pay for anything. They had prices. We just have it sitting there.

You guys don't pay for anything, ever. It's only for us. He doesn't charge, people don't go there. And the demand for it is so big, he's actually building eight more villas right now and like a high rise apartment to go their because they're just, you know, People are winning here so much.

So incredible. It's what makes us different. Now, this is where we call these leadership bonuses. Its check match. Think of it that way. I wanted to just point one thing out.

All this means is as a team leader and above, this first generation just. Like right now this month, it's only 15%. But next month is jumping to 40. What?

What does this mean? It means we are creating a culture of winning. And winning means for me as a director, everybody I sign up, I get a 40% check match on what their check is.

But what did you just say? Yeah, just said that out loud. So do you think I am highly motivated to get as many people on my team making 10,000 a month as I can?

50,000 a month as I can. What do you think will happen if I have 10 people on my team making 100,00 a months? What is my one, that's just one part of my check.

You know what that means? We help people win. That's the culture. We develop people. we don't compete inside each other. I want my Team winning. So all of us are motivated down and down, and to keep helping.

that just what this means. Okay, again, now if I've done anywhere near a decent job, let me know in the chat by saying this. If I, if i've, done a good job you're like, listen, sign me up, drop a A, give it to me, somebody send me a link, who sent me here, I want my link girl, get me in, take my money.

That's you ready to go. All right. If you're curious, you like, listen, B, like girl, this was interesting. She was a little wild and I don't know, that was real fast.

I have questions, call me. That's B. C is, Listen, I, don' care about making any money, but I want to look like the glow up lady. Cause that, and you know like that the thing.

And I'm a dude, my hair is this is not looking good. I wanna scrub it all over the place. Then you drop a C, I want a buy, somebody send me a link. D is I am not interested right now, but don't forget about me.

Circle back. Keep me, let's go to dinner. Let me know if you're doing something else. So if your there, drop it in there so the person can see. And then let' talk about this.

What's the future of Vermont? I hope it's you. Now I'm gonna stop my share. I have gone too long because I technologically challenged. And I didn't want that, right?

Hang on. Are we, you guys are not seeing my screen, Right? Okay. Fantastic. You know, sometimes me, I'm going to end with this. Sorry. It's a little long, but I was trying to find my technical problems.

I, one would like to say thank you for coming and sharing your Saturday. You know, spending your time with me and letting me try something new to learn about the products and the opportunity in closing, I'm going to talk to the women first, but then I'll talk the men.

So men don't leave me. It might be, what are you four of you in here? I don' know exactly. All right, ladies, let's recap this. Why beauty? Why the face?

Why, Raman, we've been sold a lie that beauty is vain, that skincare is surface, That tending to the face is somehow less valuable than tening to mind or soul.

But the truth is, your face, is the soul's signal. It's how we connect, it's we trust, It is how fall in love. It's how we build community. The faces where the nervous system speaks its first language when you're tiny before words.

It tells the world I'm safe. I am radiant. And every time a woman touches her face with care, she's not just applying a product. She's whispering to her nervous system, you are safe.

You are seen. you're loved. And guess what? The skin responds. the lymph moves, the fascia releases and the glow comes not from makeup but from inner movement, softness and sacred chemistry.

Closing appeal and call to action

Now imagine a woman being offered not just a product but a portal to a ritual that combines ancient Korean skincare wisdom with modern healing science.

a double cleanse that slows her breath. A hydration system that nourishes the fascia, reduces inflammation and ignites collagen production. It's a central ritual that becomes a lifestyle.

And if you want an income that leads to freedom. So we're not just selling skincare, we are activating a movement. We're helping women come home to their bodies, their beauty, and their brilliance.

And for those ready to build, this is a business rooted in truth, trust, and radiant results. It's a financial model powered by real transformation, as you saw, not gimmicks.

And it's grounded in products that work. Why? Because they honor your nervous system, Not destroy it. Beauty is not vanity, beauty is vibrational. It's how you show up, how to lead, and how do you heal.

And when a woman reclaims her radiance, she becomes unstoppable. Now, let me shift the gears for a second. Last thing, just give me two minutes with the men.

Because I know men in the room right now might be like thinking, listen, this all sounds lovely for my wife, but skincare for me? Let me say clearly. Yes, you boo.

Men want to look good, feel good and age well too. And it's not about vanity. It's about vitality. it about presence. Its about how you lead. When your nervous system is fried, it shows on your face.

When you're grounded and confident, It shows there too. And men, your skin, Your breath, you energy, they all walk into a room before you even say a word.

So I suggest, why not treat your Face as the most important business card that you've got. So Remond for you isn't about being pretty. It's about skin care that supports your mitochondria, reduces inflammation, hydrates fashion, stimulates your vagus nerve, so you recover better, sleep deeper, think clearer, and show up stronger.

I'm gonna say it like this, this is performance enhancing skin care. You just didn't know you needed it yet. And here's the best part. This isn't just about using the product, it's about sharing it if you want.

Because what happens to a man when you introduce him to something that helps him feel more confident in his body and clear in mind? That's legacy. That leadership, that's impact, and that is power.

So thank you for joining me on my little experiment and my ride here tonight. I'm personally inviting you to join us. Please get back to the person that told you about this call.

Tell him or her thank and that you're ready to get started either with the products or the business. And remember, You're not just applying product, you're whispering to your nervous system.

You are safe. you are seen. And from that place, confidence grows. Leadership is born and legacy is built. I'm doing it here at Riemann and I hope you do it with me.

Thank y'all. There will be a recording. If that was a different experiment, I apologize about the video. I want a lot of A's coming up. Hey, get me started, Get me Started, I Want $7,000 Packs.

Let's go. I say go big or go home. Okay. Love y'all.
