Introduction to AIC Therapy

Calciumu2019s Role in the Body

How Calcium Signaling Affects Health

Cellular Calcification and Chronic Disease

How AIC Therapy Works

Closing Remarks and Call to Action

hello I'm Dr Sarah bosan it's great to hello I'm Dr Sarah bosan it's great to have you here today I'm going to talk have you here today I'm going to talk about AIC therapy anti orbital ionic about AIC therapy anti orbital ionic calcium therapy get ready to hear calcium therapy get ready to hear something powerful this could be a something powerful this could be a turning point in your health Journey AIC turning point in your health Journey AIC therapy is a breakthrough it helps your therapy is a breakthrough it helps your body find balance again and activates body find balance again and activates your natural healing power for many your natural healing power for many people it is the missing piece but first people it is the missing piece but first let's take a closer look at what calcium let's take a closer look at what calcium really does in your really does in your body calcium is not just for bones and body calcium is not just for bones and teeth it helps your heartbeat your teeth it helps your heartbeat your muscles move and your brain send muscles move and your brain send messages even your immune system needs messages even your immune system needs it when calcium is low your whole body it when calcium is low your whole body can feel out of balance can feel out of balance that's how important calcium really that's how important calcium really [Music] [Music] [Music] is your body is smart it keeps calcium is your body is smart it keeps calcium levels tightly balanced all day every levels tightly balanced all day every day even small changes too high or too day even small changes too high or too low can affect you that's why your body low can affect you that's why your body works hard to control calcium all the works hard to control calcium all the time we use calcitonin and parathyroid time we use calcitonin and parathyroid hormone for this precise regulation but hormone for this precise regulation but calcium does more than balance it also calcium does more than balance it also cells did you know your cells talk using cells did you know your cells talk using calcium these small calcium signals calcium these small calcium signals control how your cells grow heal and control how your cells grow heal and handle stress but when these signals get handle stress but when these signals get off track you can feel tired get pain or off track you can feel tired get pain or even develop chronic illness the good even develop chronic illness the good news fixing those signals helps your news fixing those signals helps your body reset and body reset and heal Let's Talk About Cellular heal Let's Talk About Cellular calcification and how it is affecting calcification and how it is affecting diseases when calcium goes to the wrong diseases when calcium goes to the wrong places in your body it can cause serious places in your body it can cause serious health problems this is known as health problems this is known as cellular cellular cellular calcification understanding how calcium calcification understanding how calcium can affect your cells is the first step can affect your cells is the first step in addressing many chronic conditions in addressing many chronic conditions it when calcium is out of balance your it when calcium is out of balance your cells cannot work properly you lose cells cannot work properly you lose energy toxins build up and inflammation energy toxins build up and inflammation starts over time this can cause bigger starts over time this can cause bigger problems like tiredness pain and even problems like tiredness pain and even serious illness and guess what it often serious illness and guess what it often it this is exactly where AIC therapy it this is exactly where AIC therapy steps in AIC therapy enhances cellular steps in AIC therapy enhances cellular communication and restores calcium communication and restores calcium balance helping to reverse harmful balance helping to reverse harmful calcium buildup in the calcium buildup in the body let's take a closer look at how AIC body let's take a closer look at how AIC therapy works on the right side we have therapy works on the right side we have regular calcium which is not active form regular calcium which is not active form it's tightly bound making it harder for it's

tightly bound making it harder for your body to use even if it's released your body to use even if it's released it doesn't easily perform its intended it doesn't easily perform its intended function on the left side AIC calcium function on the left side AIC calcium which is in active form ready to use which is in active form ready to use form its weak binding allows it to form its weak binding allows it to effectively AIC therapy is different effectively AIC therapy is different from regular calcium it doesn't need to from regular calcium it doesn't need to go through your intestines it's absorbed go through your intestines it's absorbed straight through your stomach straight through your stomach wall it goes into your blood as active wall it goes into your blood as active ion calcium the active form your body ion calcium the active form your body uses right away no extra steps so it uses right away no extra steps so it works faster Sports your cells better works faster Sports your cells better and can even wake up unused calcium and can even wake up unused calcium body when we remove extra calcium from body when we remove extra calcium from your cells stress and inflammation go your cells stress and inflammation go down fast that helps your cells work the down fast that helps your cells work the right way again then your body starts to right way again then your body starts to heal oxygen flows better your immune heal oxygen flows better your immune system gets stronger you feel it to system gets stronger you feel it to stronger bones more energy and better stronger bones more energy and better overall overall overall health many health problems start with health many health problems start with calcium imbalance AIC therapy helps fix calcium imbalance AIC therapy helps fix this by restoring calcium signaling and this by restoring calcium signaling and helping your cells heal it brings your helping your cells heal it brings your body back into body back into balance want to feel better visit our balance want to feel better visit our website to learn more I would love to website to learn more I would love to hear from hear from you thank you very much for you thank you very much for listening I Dr server and I am here to listening I Dr server and I am here to
