Introduction and Interview Welcome

Hey, it's Nathan Crane, director of the Health and Healing Club and host of the Conquering Cancers Summit. And today, I am honored and excited to welcome you to a very special interview.

Nano Bath and Oxygen Therapy

Hi. I'm Doctor Lakin Neely, the medical director at Cancer Center for healing. So here we are in our nano bath. It looks like a conventional bathtub, but it isn't.

It's actually pure filtered water. And you can see the nano bubbles and it makes the water look a little milky. But these are nano bubbles and oxygen.

Well, what do you need oxygen for? Basically everything. So this penetrates as far as four centimeters from the surface of the skin. So just for skin conditions alone, it helps with infections, psoriasis a basic cleansing and exfoliation.

Why Oxygen Matters for Health

And then most importantly it absorbs these negative ions of oxygen to go and absorb and be all over your body through the trillions of cells in your body.

Every one of your cells needs oxygen. So you need oxygen to purify and detoxify the body. You need oxygen for every chemical reaction that takes place.

You need oxygen from the your arteries delivering oxygen through your capillary bed to your veins. So oxygen. Let's face it, is first requirement for being alive.

So how does oxygen relate to cancer.

Oxygen, Cancer, and Treatment Approaches

Well, I've got Warburg, a very famous German, scientist discovered that cancer cells glide through an anaerobic environment. Anaerobic means without oxygen.

So I tell all my patients that cancer is a sugar loving, acidifying, low oxygen environment. So all of our patients, we'd love to have either hyperbaric oxygen or the nano band or ozone to super oxygenate the body.

So for more information, please go to Cancer Center for healing.com. And I want to thank everyone for tuning in to the conquering cancer Summit. Please share this with friends and family together.

We truly can make a difference for the future of humanity in ending the cancer pandemic.

Closing Remarks and Call to Share

Thank you and I wish you ultimate health and happiness. Be well.
