Introduction and health crisis

I'm Gray Jordan. Hi, I am Jill Jordan, and we're here at Deeper Healing to discuss the health challenges we faced over the last few years and how deeper healing helped us to get back on track.

About three years ago, we were living in Northern California.

Mold exposure and rapid decline

and I was working at a winery and was exposed to a toxic mold that within really hours of being exposed it started affecting my mobility, my cognitive functioning and…

You started with your arm, you couldn't hold your arms up, that fell down and then you started falling down. And then finally you were in a wheelchair and couldn t even stand up.

So when we first got back to Charleston, I connected with a friend of mine from high school and she had had issues with mold. And so she recommended Deeper Healing and Dr.

Bowerschmidt and Danielle. So we gave Deepers Healing a call.

Finding Deeper Healing

I remember we talked to Danielle and she was like, oh my god, just get in here and let's just to get started and we're going to figure it out and you're gonna get through this.

And I remembered for me that was a turning point. It was and both of us were like… Because I didn't know if I was gonna ever get better at that point and Danielle opened my eyes.

So we came in and I sat down and did an interview with Dr. B and Golden Marsh Story. And he basically came up with a protocol to help me A diagnose what was going on with me and then B to like sort of, you know, sequentially move through all the different processes that could help you heal.

Treatment plan and financial support

And so. After we got the process started, we were already sort of at our wits end at that point. You didn't have any money, you didn' have these surplus.

We just knew that we needed to do this so that I could heal. And that's when we learned about the foundation. Basically, it's an organization set up by the founders of Deeper Healing to help people who can't afford the treatment.

And so we applied to the foundation and because of our extraordinary circumstances, we were approved to get some funding.

Recovery and gratitude

And basically within weeks after starting the treatment, I started to be able to walk again and I starting to heal. And the healing has stopped. It felt like a miracle.

And it's still happening. Felt miraculous after all we've been through. We couldn't have done it without the Foundation. it was a huge part of helping us get through it.

and we want everybody to have those options.
