Introduction and Interview Welcome

Hey, it's Nathan Crane, director of the Health and Healing Club and host of the Conquering Cancers Summit.

Neonatal Bath and Filtered Nano-Bubble Water

And today, I am honored and excited to welcome you to a very special interview. Hi. I'm doctor Mark Neely, the medical director at Cancer Center for healing.

So here we are in our neonatal bath. Looks like a conventional bathtub, but it isn't.

How Oxygen Supports Skin and Cellular Health

It's actually pure filtered water. And you can see the nano bubbles and it makes the water look a little milky. But these are nano bubbles and oxygen.

Well, what do you need oxygen for? Basically everything. So this penetrates as far as four centimeters from the surface of the skin. So just for skin conditions alone, it helps with infection and psoriasis a basic cleansing and exfoliation.

Oxygen, Cancer, and the Warburg Effect

And then most importantly, it absorbs these negative ions of oxygen to go and absorbed and be all over your body through the trillions of cells in your body.

Every one of your cells needs oxygen. So you need oxygen to purify and detoxify the body. You need oxygen for every chemical reaction that takes place.

You need oxygen from the your arteries, delivering oxygen through your capillary bed to your veins. So oxygen let's face it, is first requirement for being alive.

So how does oxygen relate to cancer. Well, I've got Warburg, a very famous German, scientist discovered that cancer cells collide through an anaerobic environment.

Anaerobic means without oxygen.

Hyperbaric Oxygen and Healing Therapies

So I tell all my patients that cancer is a sugar loving, acidifying, low oxygen environment. So all of our patients, we'd love to have either hyperbaric oxygen or the nano band or ozone to super oxygenate the body.

So for more information, please go to Cancer Center for healing.com. And I want to thank everyone for tuning in to the Conquering Cancer Summit. Please share this with friends and family together.

Closing Remarks and Call to Action

We truly can make a difference for the future of humanity in ending the cancer pandemic. Thank you and I wish you ultimate health and happiness. Be well.
