Finding a Doctor Who Listens

Well, let's put it this way. I've seen many, many doctors over the years. Dr. Bowersmith is a class act for sure. Not only does he listen, which is rare with doctors, but extremely compassionate, understands what we're going through.

He's gone through similar things. So it's been over the last two weeks, really, easy to speak with him and really let him know the good and the bad of what I'm going though.

I always feel like he takes the time.

Clear Explanations and Compassionate Care

That's what like, he listens and he gets it. And he also tells me everything he was doing beforehand. Before he started putting a needle in me, This is what I'm going to do and this is how it's going work and these are the things you may feel over the next couple days.

So yeah, it was refreshing to actually have a doctor listen to me. And when you say you've seen a lot of doctors, this like 30 years of. I mean a lotta doctors.

Yeah, 30 Years of going at different doctors from, you know, family doctor specialist and yeah he's a guy I would recommend for sure.
