Report of Findings Overview

The report of findings visit is now the culmination of what we did in the initial consultation. It gave us as practitioners the opportunity to take all of the data that we established via the consult, reviewing your case history and your symptom survey and all the information that you'd have given us.

and it allows us to formulate the plan that is correct for you, your body, and your case.

Sharing Test Results and Nutritional Plan

So in the Report of Findings visit, we get a chance to now disclose to you what organs or glands we found to have some dysfunction or stresses upon them.

We have the opportunity to share with you now what nutritional products we've found, why we have found them, how in fact they will improve the quality of your life, or the root cause of why you have a symptom.

In the report of findings visit we also lay out what our course of action is with So we break down programs into three phases.

Treatment Phases and Healing Process

We break what's called fine-tuning, healing and observation, and maintenance. In the report of findings as it pertains to your specific case, we will go into great detail what each of these phases represent and how we expect the healing process to go with you.
