Environmental Toxicity and Health Concerns

to the students is wrong. Yes and there is one thing that everyone can agree on and that's we just don't know enough about it. Flint's tap water was laced with dangerous levels of lead.

New synthetic chemicals that are created every hour.

Testing the Body for Hidden Exposures

Half of the US population lives in areas with unhealthy levels. Our environment is toxic. So I wanted to verify what are the top environmental medicine clinics doing about these issues.

Is there hope? She told me, Nick, you have to see what we're doing. We're going to have you test it and see, what's inside your body. In a world that is increasingly toxic, how can we truly heal?

Environmental Medicine Protocols in Action

Two students of the best doctors in environmental medicines literally improving these protocols. adapting them to the new exposures that people have nowadays.

I've never really been on an experience like this, testing my body and being the guinea pig for such an experiment.

Recovery and Hope Through Treatment

Five, four, three, two, one. Hit it. I saw people who had immense body burden. They were completely debilitated, not able to even stand up on their own.

The color was back in my face. It was like I was Back to Life. it means we can heal. You can feel better right now.
