Deeper Healingu2019s Mission

when the concept of deeper healing was just beginning to form in my mind. And what I was trying to do was create a paradigm that was easy to understand, that people could wrap their heads around as to how they were sick.

While it has provided me a great paradigm for which to help people figure that out, it's also become something far beyond anything I'd ever thought. One of the things I love about deeper healing is that we do all parts of body.

We do mind, body, spirit, treatment.

Whole-Person Care and Team Culture

Were not just looking at one aspect because when you have several different treatment modalities on your one roof, you can do so much more and you help these patients heal so fast.

And the other thing I like about our clinic is our staff is so positive. they know exactly that they're in the right place because they automatically start feeling someone cares about them and wants to see them.

We've got cheerleaders everywhere wanting everybody to get well and it makes such a difference when you're trying to stay healthy and vital. Something that makes us special here is that we've been the patient, we have been on your side and in your shoes.

We know what it's like to feel hopeless and to need some guidance. So we know the proper tools to get you better.

Patient Experience and Results

I think people travel so far to deeper healing from all over the country because we get results. It's really important to have collaboration between the providers and the rest of the team.

And it's hard to find that at other places, but we can amazing results because of that. My body started failing probably in my late 30s, early 40s. I'd go to the doctors trying to figure out what was wrong.

They tested me for MS, ALS. Even had a heart catheter done when I was around 40. So I walk in to Dr. Bowersmith's office and I'm at my ropes in, so I am willing to try anything.

And for the one time and the first time ever, I actually had doctor tell me he thought he had the answer. He said, hey, I know I can help you. Dr. Bauer-Smith stayed by my side.

he believed in me.

Finding the Root Cause

The deeper healing team that was here, they were like family and they are like families still today. But the bottom line is if you truly are hurting and you really truly truly believe that there is something different out there, i recommend you to come and see the deeper healin team because this is like nothing else you can ever experience in life.

Deeper healing is doing exactly what the name of business says. They're doing a deeper dive into people's health and wellness and overall, just a holistic approach to everything.

And they're looking at each person as a person and a unique set of circumstances. and they are taking the time, they doing the deep dive and the blood work to see what's the root cause.

If I could tell anybody anything, it would be to take the step to come and see Dr. B and his staff because it literally was life-changing for me.

Taking Control of Your Health

The staff that we have assembled here, people feel taken care of. They feel held. they feel like they're in a safe space. We have nothing more than your health and your improvement in your Health and you're healing as our sole core purpose.

It's time to take control of our lives. it is time for us to be able to choose the path of our life. We're here to show you what work needs to done and how to get it done, and we will walk every step of the way with you, so long as you keep walking.
