Digestive Issues and Bloating

So some of the most common things that I see here is digestive issues. I've got that gassy bloaty feeling or when I eat I just feel terrible. You know I this several times a day and these are one of most fun cases because they're so fun to work with because when people come in the next day they are like I went to the bathroom and it was awesome.

You know, it's those small little joys in life we get as adults like, hey, I'm going to bathroom, and I am sleeping better. And it is like those little wins are such big wins to us.

It's one thing like I can't help but smile.
