Cost of Neglecting Health

My question to you would be, how much is it going to cost you to not invest in your health? See, I hate to get caught up in the dollars and cents, and I won't leave it out of this.

We will talk about it. But what does it cost to poison yourself? I'm not being a smart aleck when I ask you that. How much money per week are you spending on alcohol, tobacco?

inorganic food, processed chemicals, sugar-loaded food.

Health as an Investment

How many things are you doing on a day-to-day, week-by-week basis that you're spending money on without questioning that is actually taking away from your body's ability and your vitality?

At Synergy Nutrition and Wellness with us, I would tell you, there is no expense. There is only an investment. If you are willing to put time, effort, energy, and money into this process, you will be rewarded.

The only time I hear the word expense is when somebody has not gotten a fair return on what their investment was. I spend thousands of dollars a year on groceries.

I spend $0 a year on pharmaceuticals. I spent thousands of dollars a years on physical fitness and chiropractic and massage and all these things that are good for my body.

So the term expense or investment is relative to where you are as a patient.

Consultation and Workshop Pricing

If you're willing to invest in your health, there is nothing better that you could do. But if it's an expense, that means you aren't getting the value out of it.

Why would that happen? You didn't put forth the effort needed to improve the quality of your life. So in an initial consultation, we have a charge of $150. If you get referred from another patient, We knock that down to $75. if you come to one of our educational workshops, you will get a consult completely free of charge.

So, in order for us to meet each other, evaluate you, You have no financial investment yet. If you come to our report of findings and you like what we're proposing to you and the course of action is conducive and stay committed, which means you're with us for at least a year, you might spend in the neighborhood of $1,200, $1500 in a course an entire year.

Year-Long Care and Value

If I were to charge full value for the services that myself and my staff provide, it would be increasingly higher than that. But we're not here to squeeze pennies and make people broke.

We're here educate them and to make them aware of the power that their body has. So if you're willing to invest the time of about a year and you are willing invest about say $1,500, guess what?

You can do amazing things. And I think if you pulled out your pocketbook and tallied up all the things that you do in the course of a day, week, month, or year, you would find that the value of investing $1500 with us is well worth it.
